“ As a small association, limited in staff, resources, and revenue, we are still expected to provide the same level of services and support that larger associations offer. Novi allows us to make the most of the administrative time so that we can get back to the real business of managing and growing our association. Additionally, due to the ease of use and intuitive features, the learning curve with Novi has been minimal. We are in love! ”

Concierge Onboarding & Data Import

With your direction and assistance, our data import experts will import your members, events, and event attendees from your old system.

Front-end Website Migration

The Novi AMS content team will assess your current website and work with your team to ensure that your home page content, website navigation, events, news articles, and other pages meet the needs of your members. The goal is to deliver a presentation-ready website that tells your organization's story and fosters member engagement.
